

# MOLITRON ODOR ABATEMENT SYSTEM

## THE MOAS FOR SIMPLIFIED ODOR NEUTRALIZATION

The Molitron Odor Abatement System MOAS is designed to provide a totally self contained system for neutralizing offensive odors emanating from commercial exhausts or any other sources of undesirable odors. The MOAS can be used with the Enviro-Clean Air Scrubber, the Enviro-Pak Filter Assembly and the Water Scrubbing Ventilators, or, can be used independently in alternate applications.

## THE MOAS WILL: PROVIDE ASSURANCE OF ODOR-FREE AIR!

The MOAS, using an odor neutralizer is dispensed through nozzles located in the exhaust air stream. Chemical neutralization changes the odor molecules structure, effectively modifying it. And, unlike chemical masking agents or perfumes that superimpose a pleasant fragrance on an unpleasant odor, odor neutralizers absorb and convert malodors resulting in no odor at all.

## EASY INSTALLATION AND MAINTENANCE

All necessary components, except for the remote atomizing nozzles, are located in a stainless steel wall mounted cabinet. When used with the Moli-tron equipment specified, the nozzles are installed prior to shipment. When used with other equipment, or in alternate applications, the nozzles are installed into the duct system by the installing contractor. Utilities required are one 120 VAC electric service and one 1/4" cold water supply.
