

# ENVIRO-PAK FILTER ASSEMBLY

The Enviro-Pak Filter Assembly (EPFA) is a 16 gauge powder coated all welded steel enclosure fitted with top, bottom, and end channels for holding in place pre-filters and high efficiency filters used for removing particulate matter and grease vapors from kitchen exhaust air.

Cooking emissions can become a neighborhood nuisance if not properly controlled. Visible smoke & odor may alert authorities to possible compliance problems.

An **ENVIRO-PAK FILTER ASSEMBLY** removes these concerns and **CREATES CLEAN AIR!**

Designed especially for light duty commercial kitchens, the **ENVIRO-PAK FILTER ASSEMBLY** can be located at any point, indoor or outdoor, between the kitchen hood and the point of discharge of the exhaust air into the atmosphere.
